ABOUT ASTOR

You see it with four wheels and call it a car.

But don't fall for stereotypes.

Because this is like no car you have ever met before.

Look within.

Take a peep inside and you will find out who it really is.

A teller of stories and knowledge.

A friend, philosopher and guide.

It will tell you when to stop.

Where to park.

It can look you in the eye and tell a joke when you need one.

It will be by your side always, keeping you safe.

The bond you will develop with it will be special.

Man. Machine. And AI.

MG Astor. The AI Affair.

PERSONAL AI ASSISTANT

Imagine a world where your car understands you, knows your voice and reacts to it. Or when you require any information, your car finds that for you. Or when you are in need of it, it cracks jokes for you making each moment lighter.

Now imagine if that car was already here.

Introducing India's First Car With Personal AI Assistant.

Wikipedia

Chit-chat and Hinglish commands

First In Segment

Wingman

The personal AI Assistant loves following your commands. So much so, that it understands myriad commands including 35+ Hinglish ones. So which one will be your first command?

Know-it-all

Caught a fleeting glimpse of something amazing and intrigued to know more? Have a general knowledge question? Feel free to express your curiosity as it uses Wikipedia.

Hilarious

Who doesn't like a joke or two? This AI assistant loves it. That's why it is always ready with one. Prepare to get your ribs tickled.

Attentive

Imagine your best friend. It looks at you when you ask anything. Awesome isn't it?

Well-informed

Won't you love to always stay informed. This AI assistant is going to amaze you with all the latest updates. Just go ahead and ask.

Festival mascot

Festivals are fun, and this AI Assistant knows it. It wishes you during your favourite festivals in its own signature style.

AUTONOMOUS LEVEL 2

Advanced Driver Assistance System is a group of safety and convenience functions intended to improve comfort for drivers and road safety, and preventing or reducing the severity of potential accidents. ADAS can do all this by alerting the driver, implementing possible safeguards in the vehicle and automating driving controls*. Autonomous Level 2 features not just make driving more comfortable but also keep your safety at the forefront. With level 2, the system can not only perform acceleration /braking functions but can also activate steering control to assist the driving.

14 Autonomous Features 

Lane Functions

Lane Keep Assist. Lane Departure Prevention. Lane Departure Warning

The multipurpose camera identifies lane markings and warns you in case the vehicle is deviating from the lane and can even correct your course. It can also actively keep the vehicle in the centre of the lane by controlling the steering.

Rear Drive Assist

Blind Spot Detection. Lane Change Assist. Rear Cross Traffic Alert

Rear Drive Assist functions monitor the vehicle's surroundings to eliminate any blind spots; which are otherwise not detected in ORVM, reversing camera and sensors. Upon detection of a possible hazard, be it a vehicle already in the blind zone or an approaching vehicle at high speed while you are changing the lane or while reversing, a vehicle which is approaching from rear left or right, the system alerts the driver through visual and acoustic signals.

Adaptive Cruise Control

Adaptive Cruise Control is an advanced version of cruise control. It senses and monitors the road ahead and automatically accelerates/decelerates for maintaining a proper distance from the vehicle in front.

Forward Collision Prevention

Front Collision Warning. Automatic Emergency Braking Automatic Emergency Braking - Pedestrian

The system alerts the driver about a probable collision with a four-wheeler, two-wheeler or a pedestrian when the gap becomes too close and applies autonomous deceleration if there is no action from the driver.

Speed Assist System

Speed Warning. Intelligent. Manual

Speed Assist System will monitor traffic signs on the road from which it is possible to infer speed limit. The system alerts the driver in case of over speeding through visual and acoustic means. It can also slow down the car to the speed limit automatically in intelligent mode. You can even set your own speed limit in the manual mode.

Intelligent Headlamp Control

Intelligent Headlamp Control activates and deactivates the high-beam, depending on the oncoming traffic and environment situation. Thus preventing other road users from blinding due to high-beam.

STYLED TO PERFECTION

Astor impresses at first glance with its striking and elegant contours. Styled with signature MG elements and distinctive athletic details, it is bound to make its presence felt, no matter where you take it.

Bold Celestial Grille
