OCTAVIA

WHAT IS IT ABOUT THE NEW OCTAVIA?

Since its Indian debut in 2001, the ŠKODA Octavia has gone from redefining premium, to taking automobile performance standards to new levels. From bringing features never seen before, to in its latest avatar, skillfully combining strength and sensibility.

Presenting the new ŠKODA Octavia.

With an exterior design that is as sleek and crystalline as it is strong and robust, the Octavia looks stunning from every angle. Inside, brilliant connectivity, safety assistants, technological innovations and simply clever features are sure to please the modern, discerning Indian. The new Octavia isn't just an example of our philosophy of making beautifully designed, passenger-focused cars that are as much of a joy to drive now as they were when we started. It is an example of how mind and muscle can meet perfectly in an automobile.

The new ŠKODA Octavia. Tough meets smart.

A photograph of a waterfront promenade. In the foreground, a concrete walkway with rectangular drainage holes runs parallel to a body of water. To the right of the concrete is a cobblestone path. In the background, there are modern multi-story buildings with large windows and balconies. The sky is bright and clear.

EXTERIOR DESIGN

MUSIC TO THE EYES

A strong, chiseled aesthetic makes the Octavia a sight to behold. Every detail bears the best of both, the classic and the modern. Indeed, a treat for the head and the heart.

FRONT VIEW

Double headlamps give the car an unmistakable look. Their exceptional design is a perfect match for the sharp edges of the fog lamps. The massive front grille with a distinctly shaped hood commands respect and vouches for features such as safety and reliability.

SIDE VIEW

The side profile of the Octavia presents smooth straight surfaces and crystalline edges that rise to command a bold view. It speaks ŠKODA's design language fluently. One that is the perfect, most optimal coming together of elegance, functionality and dynamics. All new multispoke R16 Alcatras alloy wheels carry forward the new design language. Gleaming chrome strips along the side windows and side view mirrors that bear turn indicators further enhance the Octavia's side appeal.

PANORAMIC SUNROOF

Let more light and fresh air in. The electrically-adjustable panoramic sunroof made from tinted glass, allows you to create a large open space above the front seats.

REAR VIEW

In the rear you will discover many elements that are typically ŠKODA: the distinctive logo and model name, crystal-shaped space for the registration plate and "cat's eye" reflectors for better visibility of the car.

EXTERIOR SIDE-VIEW MIRRORS

The body-colour electrically adjustable exterior mirrors and body underscore the elegance of the car.

EVERYTHING IS ILLUMINATED

The exterior lights of the car make us consider not only their usefulness but also their aesthetic quality. When you combine innovative technology with a unique design, lighting becomes an artistic matter and significantly increases passenger safety.

QUADRA LED HEADLIGHTS

Two types of headlamps are available for the Octavia, including a full LED option with CrystalGlo LED Daytime Running Lights, offering LED technology across all functions, with high performance and high energy efficiency.

LED REAR LIGHTS

The OCTAVIA's lighting signature is expressive and clear. The rear lights (available in two variants) are always equipped with LEDs. The distinctive C-shape illumination, typical of ŠKODA models, makes the vehicle confidently stand out.

INTERIOR DESIGN

WELCOME HOME

The robust, chiseled good looks of the exterior give way to an interior that is both astutely designed and beautiful. One that is made more comfortable and familiar with soft, harmonious ambient lights running along the inside of the car.

LED AMBIENT LIGHTING

It's up to you to choose one favourite colour or to complement each day with a different tone. The ambient lighting offers ten appealing colour options - Cool White, Fire Orange, Cinnamon, RS Red, Pink, Purple, Dusk Blue, Azure, ŠKODA Green and Acid Green.

ŠKODA Green ambient lighting.

Dusk Blue ambient lighting.

RS Red ambient lighting.

FOOT AREA ILLUMINATION

The discrete illumination turns a comfortable space into an exceptional one. Experience ultimate comfort thanks to the interior lights, and enjoy a discreetly lit ambience during your journey.

CONNECTIVITY

THE CAPITAL OF YOUR DIGITAL UNIVERSE

Infotainment has evolved just as much as the automobile. And what better example of this evolution than The ŠKODA Octavia. Look forward to breath-taking features and intelligent functions. With the Octavia's seamless connectivity and entertainment options, drives will never be boring again, no matter how long the journey, or tough the road.

MEDIA COMMAND APP WITH BOSSCONNECT

The new ŠKODA Media Command App with BossConnect allows you to control the infotainment system on your phone. This feature is integrated into the Amundsen infotainment system and the new ŠKODA App, even allowing people in the back to operate the functions using their smart device.

SMARTLINK

With the SmartLink system (ŠKODA Connectivity bundle supporting MirrorLink®, Apple CarPlay and Android Auto), the car's infotainment system enables the driver to safely use the phone while driving. Plus, all installed applications that are certified as safe for vehicles are compatible with MirrorLink®, Apple CarPlay or Android Auto.

USB

A socket for the connection of your external device is within reach on the centre panel.

The top-range navigation and entertainment center features a sharp and vibrant 8" colour touch-screen to display maps and other functions. It also offers a USB connection, SD card slot, Bluetooth, SmartLink Connectivity and eight speakers. The device can be used to control the car menu.

SIMPLY CLEVER

GENIUS IS IN THE DETAILS

Often, the smartest ideas are also the simplest. The 2017 ŠKODA Octavia is proof positive of this. It comes with features based on real needs and includes Simply Clever details that are as ingenious as they are intuitive.

TICKET HOLDER

When you need to display a parking ticket in a visible place, the solution is simple. The car is equipped with a parking ticket holder under the windscreen.

SPACE IN EVERY PLACE

Storage compartments significantly increase the practicality of the car. They simply multiply its transport options, help keep the car tidy and make travelling more pleasant for all passengers.

GLOVE COMPARTMENT

A closed storage compartment located conveniently in the dashboard can store a variety of important things. When used along with the air-conditioner, it can even keep beverages and snacks cool while traveling.

**FRONT DOOR COMPARTMENTS**

You will find a bottle holder in a spacious compartment in the front door. This is also where you can place a removable waste basket.

**ARMREST**

The passengers' comfort in the rear seats is enhanced by a tilting armrest with two drink holders.

CAR WITH A BACKPACK

The luggage compartment capacity puts the Octavia at the top of its class. Space can be further maximised by increasing practicality. To do this, we offer a range of Simply Clever details and solutions, which you can choose according to your needs.

CAPACITY

The Octavia can easily provide plenty of luggage capacity for a large family, no matter which version you decide upon. It comes with 590/1,580 litres after folding down the rear seats.

LUGGAGE COMPARTMENT

The luggage compartment makes the new Octavia an extremely practical car that will satisfy the demands of large families and large groups alike. From large suitcases and bags to camping/sports equipment, everything fits perfectly. And what's more, never end up with crumpled bags or things spilt about. Simply hang them on the bag hooks and you're set.

COMFORT

DRESS CODE: COMFORTABLE

Driving should be a pleasure, not a chore. No matter whether you're on business or vacation, numerous details and clever touches make every drive in the new ŠKODA Octavia more comfortable.

MULTI-FUNCTIONAL STEERING WHEEL

The multi-functional steering wheel is a unique blend of attractive design and modern technology. It has built-in audio controls and Bluetooth so that you never have to take your hands off the wheel when you want to change the track, the radio station or even when calling your friends.

KESY

Cars equipped with KESY (Keyless Entry, Start and exit System) feature a Start/Stop button on the steering column for keyless ignition and switching off the engine.

ADUAL-ZONE CLIMATRONIC

The climatronic dual-zone air conditioning with clean air function features electronic regulation. It is also fitted with a humidity sensor, which reduces windscreen misting.

USB CHARGING PORTS

Never be deprived of the incredible benefits of your modern entertainment and communication devices with the Octavia's USB charging ports. With not one, but two of these handy powering ports, juice up those phones or tablets to your heart's content.

CRUISE CONTROL

In addition to maintaining the pre-selected speed, cruise control enables you to increase or reduce speed without using the pedals.

12 WAY DRIVER SEAT WITH BUILT-IN MEMORY

The electrically-adjustable driver seat with built-in memory can store three different seat and external side-view mirror positions.

LED BOARDING SPOTS

The boarding spots with LEDs, designed to illuminate the entry area, are located on the external side-view mirrors.

RETRACTABLE MIRRORS

The automatically retractable external side-view mirrors fold down when the car is locked, thus being protected against damage.

HEADLAMP WASHERS

Integrated telescopic headlamp washers easily take care of dust and mud.

PANORAMIC SUNROOF

With the Laurin & Klement version, you will enjoy the feeling of freedom and even greater space with the electrically-adjustable sunroof, made of tinted glass ensuring lower light transmission and thermal permeability. You can either tip it upwards or slide it backwards, creating an open space above the front seats.

SAFETY

YOU'LL NEVER DRIVE ALONE

The toughest safety standards need the smartest minds to achieve. Such as those of the engineers at ŠKODA. Various active and passive assistant systems ensure that every drive in the OCTAVIA is safe and secure. Respond promptly and smartly to whatever the road throws at you.

HANDS-FREE PARKING

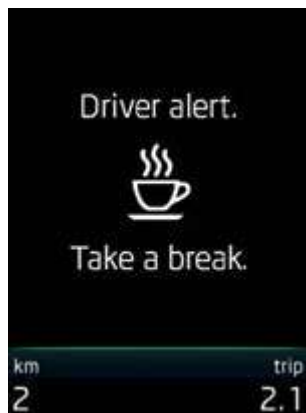

The Octavia's state-of-the-art hands-free parking doesn't just give you greater comfort and orientation while parking. It gives you confidence to park like a pro every time.

Hands-free parking minimises the hassle of parking in tight spots by automatically selecting an appropriate parking place in a row of parallel or perpendicularly parked vehicles. When parallel parking, it only needs a space 60 cm longer than the car itself. In today's crowded cities and space-starved streets, hands-free parking is a blessing indeed.

REAR-VIEW CAMERA

Enjoy easier parking by equipping your car with the rear-view camera located on the handle of the 5th door. It monitors the space behind the car and indicates driving lanes, based on the vehicle width.

iBUZZ FATIGUE ALERT

This clever assistant system evaluates data from the power steering sensors to detect any driver fatigue. In such cases, the colour Maxi DOT display warns the driver to take a break.

AFS (ADAPTIVE FRONTLIGHT SYSTEM)

The system is automatically activated by the light sensors, which switch the headlights on in low light conditions. The AFS headlight control system changes the geometry of the light beam, adapting the light pattern on the road to different driving situations like: Load, Steering angle, Rain and Speed. The AFS optimises illumination and enhances safety by enabling quicker response to obstacles. It gradually shifts the light patterns so that it does not disturb the driver.

CORNERING FOG LAMPS

This function switches on the right or left fog light separately - depending on the steering angle or by switching on the turn signal lights for the relevant side. Corner function is incorporated in the front fog lamps. They illuminate blind spots created by dark areas around the corners by lighting the space the car is about to turn into. This improves visibility for the driver without dazzling oncoming obstacles.

SAFE HAPPENS

In extreme situations, where the driver cannot actively influence the outcome, the car's passive safety elements take over – like the airbags. You can equip your car with up to eight of them.

HEAD AIRBAGS

Upon activation, head airbags create a wall protecting the front and rear occupants against head injury.

FRONT DRIVER AND PASSENGER AIRBAGS

While the driver airbag is enclosed in the steering wheel, the passenger airbag is located in the dashboard.

FRONT AND REAR SIDE AIRBAGS

These four airbags protect the pelvis and chest of the driver and other passengers in the event of a side collision.

PERFORMANCE

POWER TO THE PEOPLE

Don't just beat the competition, leave it in the dust. The Octavia comes with powerful, refined engine variants that are nothing short of modern marvels. But it doesn't just stop there. It is a car that has a supreme regard for the environment. In keeping with a long standing tradition of ŠKODA's green thinking, the Octavia is high on fuel efficiency and low on emissions. Go ahead, call it an over-achiever.

TRANSMISSION

Depending on the engine version, the car can be equipped with a manual 6-speed or an automatic 6-speed as well as 7-speed DSG (Direct Shift Gearbox).

ENGINE

The Octavia features its third generation petrol engine in two variants, designed exclusively for the new MQB platform. A 4-cylinder, 1.4 TSI/110 kW, and a powerhouse 1.8 TSI/132 kW petrol engine. These engines aren't just lighter and fuel-efficient, but also reduce CO2 emissions.

The 2.0 TDI/105kW diesel engine, also from the MQB family, offers high power output, is more refined, fuel-efficient, and features lower emissions as well.

**HILL HOLD CONTROL**

With Hill Hold Control, you will start off smoothly uphill without having to use the handbrake, or risk inadvertently rolling backwards.

CUSTOMISATION

A person wearing a grey suit jacket is looking out a window. The window frame is visible, and the view outside shows a multi-story building with windows and some greenery. The scene is brightly lit, suggesting daytime. The word "CUSTOMISATION" is overlaid in large, bold, black letters across the center of the image.

LAURIN & KLEMENT

The standard equipment of the Laurin & Klement version includes a panoramic sunroof, leather upholstery, Climatronic dual-zone air conditioning with clean air function, 12-way electrically adjustable driver seat with lumbar support, Canton Sound System (9 Speakers, 1 Subwoofer) plus more.

BADGE

The original Laurin & Klement badge on both front mudguards is a reminder of ŠKODA's founding fathers. It's a symbol of the highest level of craftsmanship and personal approach, which is our predecessors' legacy.

CANTON SOUND SYSTEM
Enjoy absolute sound clarity, whether it's music or the spoken word, on the Canton Sound System with nine speakers and a subwoofer in the luggage compartment.
